

Unlocking the potential of cell-free DNA

Dynamic Devices has developed a revolutionary automated liquid handling solution for cell-free DNA extraction that can be performed on a single workstation!

Offering accelerated extraction, high-throughput and high quality mixing, the 24ST Pipetting Tool and iMagZ optimizes your liquid biopsy workflow from extraction to purification to analysis!

24ST PIPETTE TOOL

- **TIME SAVINGS** processing samples in 24well units
- Large volume capacity with 5mL tips that allow for **HIGH VOLUME TRANSFERS**
- **FAST** and improved mixing capabilities (4000uL/s)

IMAGZ (MAGNET ELEVATOR)

- **INDEPENDENT CONTROL** of each iMagZ (raised/lowered independently)
- Fast - **ELIMINATES THE NEED TO MOVE SAMPLES** on and off magnets for incubation/wash steps
- **NO NEED FOR A GRIPPER** to move plates, which saves time and money
- **ADJUSTABLE** to fit all common magnet types and SBS plates
